LeetCode | Codeforces | GeeksforGeeks

Professional Summary

B.Tech student specializing in Artificial Intelligence and Machine Learning, with hands-on experience building Python-based ML systems (CNNs, RAG, NLP) and full-stack applications using Java and Spring Boot. Passionate about solving complex problems, backed by solving 1000+ coding challenges and achieving a Top 9.68% global ranking on LeetCode.

Education

Noida Institute of Engineering and Technology (NIET) **2023 – 2027**
B.Tech in Computer Science and Engineering (AI & ML) | CGPA: ***8.82*** *Greater Noida, Uttar Pradesh*

Experience

Java Full Stack Developer Intern | Infosys Springboard **Oct 2025 – Dec 2025**
Full Stack Developer (Remote) *Remote*

- Developed 'InsurAI', a scalable full-stack web application featuring **5+ RESTful APIs** for discovering insurance policies and managing user applications efficiently.
- Engineered the backend using **Spring Boot and MySQL**, optimizing database queries to handle multiple policy data transactions concurrently.
- Implemented **JWT (JSON Web Tokens)** authentication to secure **100%** of sensitive user endpoints and enforce strict role-based access control.
- Project Repository: github.com/Abhishekkumar071/InsurAI

Projects

Smart Knowledge Retrieval System & Q&A Engine | Python, LLMs, Vector DB, RAG **2024**

- Developed an enterprise-grade retrieval system using the **RAG framework** to extract actionable insights from unstructured datasets, including multi-page PDFs and technical manuals.
- Engineered a data pipeline to parse and chunk documents, generating high-dimensional **vector embeddings** for sub-second semantic search operations.
- Eliminated LLM hallucinations by grounding **100%** of generated responses directly in the retrieved context, bypassing the limitations of traditional keyword search.
- Repository: github.com/Abhishekkumar071/document-qa-engine

Emotion Detection using FER2013 (MoodVision) | Python, CNNs, OpenCV **2023**

- Built and trained a **Convolutional Neural Network (CNN)** on the FER2013 dataset of **approximately 32,300 images**, classifying facial expressions into **7** distinct emotion categories.
- Achieved a peak classification accuracy of **63%** on complex visual data by fine-tuning model parameters.
- Integrated **OpenCV and Haarcascade** classifiers to capture and process live webcam video feeds for real-time model inference.
- Repository: github.com/Abhishekkumar071/MoodVision

AI-Based Internship Matcher | Python, SQL, NLP, Machine Learning **2023**

- Built a matching system for the **Smart India Hackathon** that parses unstructured text and extracts core skills using NLP techniques.
- Computed data similarity using **SQL** to accurately filter and rank the top **10** best internship matches for each simulated student profile.

Technical Skills

Languages: Java (Preferred), Python, SQL, C, JavaScript
AI & Machine Learning: Generative AI, RAG, LLMs, NLP, CNNs, LangChain, Vector Embeddings
Backend & Databases: Spring Boot, Node.js, Express.js, REST APIs, MongoDB, MySQL, PostgreSQL
Frontend & UI: React.js, Tailwind CSS, HTML, CSS
Tools & Concepts: Git, GitHub, Jupyter Notebook, Postman, JWT Authentication, ACID Properties

Achievements & Competitive Programming

- Successfully solved **1000+ algorithmic problems** across all major competitive programming platforms.
- **LeetCode:** Achieved a Contest Rating of **1758**, placing in the **Top 9.68%** globally. Profile: leetcode.com/u/Abhishek_670
- **Codeforces:** Reached a maximum contest rating of **1173**. Profile: codeforces.com/profile/abhishek_670

Certifications

Infosys Springboard: Introduction to Machine Learning and AI, JavaScript Essentials, Natural Language Processing using Python, ReactJS
